

Agricultural machinery mechatronics engineer  
Apprenticeship at your CLAAS dealer.

**CLAAS** | | | | |

CLAAS is one of the world's leading manufacturers of agricultural machinery. "Harvesting the future" – our customers can rely on that. Therefore, they not only need premium products, but also talents from all areas of work who are able to work in direct contact with our customers. People with talents who want to start their career with an apprenticeship at a CLAAS dealer and want to move things forward. People like you.

Our dealers sell the whole programme of CLAAS harvest technology and tractors, offer a comprehensive service and guarantee a quick supply of spare parts. In your apprenticeship, you can expect a varied, personal working environment and excellent career perspectives. In short, a job with a future.

## Apprenticeship Agricultural machinery mechatronics engineer

A LEXION combine harvester works like a factory on four wheels. Here, and in many other CLAAS machines, is a lot of technology. Technology which challenges you and on which you can learn for your life. Did you always want to know how our machines work? Then come to us.

During the apprenticeship as an agricultural machinery mechatronics engineer, you can really get into action: You maintain and repair machines such as combine harvesters, balers, tractors and prepare them for resale. You either do this in the workshop or directly at a customer's site. Service and consulting are important components of the apprenticeship: Soon you will become an essential contact person for our customers.

Not only technical understanding is required – but also your specialist knowledge which you learn on site and at school. Because our machines are equipped with ultra-modern, intelligent technology. So you are fully challenged when you make error and trouble shooting diagnoses, isolate and eliminate the causes of problems. You make sure that everything runs smoothly.

To start your training as an agricultural machinery mechatronics engineer, you do not have to be grown up on a farm or have an agricultural background. You should bring along manual skills

and an interest in electronics, mechanics, hydraulics and pneumatics. Do you like to use your muscle power and your brain? Are you a team player, flexible, responsible and able to work in a team? Then we look forward to receiving your application!

### What you can expect:

- Three and a half years of apprenticeship
- Direct contact to our customers
- A familiar working atmosphere
- A varied working environment
- Ultra-modern technology
- Agriculture as an industry of the future

### What we expect from you:

- Good school leaving certificate
- Understanding of technology and manual skills
- Service orientation in dealing with our customers
- Flexibility and sense of responsibility
- Enjoy working in a team
